

Meet on

“Machine tool Industry: Current scenario and the way forward”

March 15th, 2018 at Central Manufacturing Technology Institute, Bangalore-560022

India is growing to become a major contributor to the global manufacturing economy. Indian machine tool industry has a major role in boosting manufacturing GDP. Indigenous development and production of high value machine tools, the aggregates of machine tools and the process technology for advanced manufacturing, have the potential to bring sustainable growth and major economic benefits to our country.

The meet on “**Machine tool Industry: Current scenario and the way forward**” is aimed, to identify the demand requirements, the challenges in meeting the needs and the competencies that can allow machine tool industry to successfully deliver innovation, self-reliance and sustained supply chain in indigenous production of advanced and high value machine tools, with the involvement of R&D centres, industries and academic institutions.

Focus theme

- ❖ Design & Development of advanced/high value machine tools
- ❖ Indigenisation of aggregates of machine tools
- ❖ Machine tools and process technology for high precision manufacturing/finishing of composite, hard and brittle materials

Special highlights

- ❖ Specific sessions for Machine tools and Aggregates for machine tools
- ❖ Panel discussion on the way forward for machine tool industry

Key takeaways

- ❖ To understand the global manufacturing context in which Indian machine tool industry must compete and how that context is expected to evolve over the next 15-20 years.
- ❖ Demand Aggregation for advanced and high value machine tools and additive manufacturing equipments
- ❖ Demand Aggregation for aggregates of machine tools

Organized By

Department of Heavy Industry,
Government of India

Indian Machine Tool
Manufacturers' Association
